

AC M620

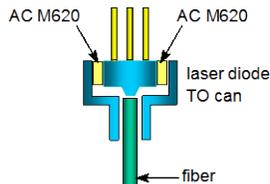

Dual Cure Adhesive for Diode Applications

Features

- Dual cure (UV or Heat) capability
- Medium Tg
- Flexible film
- High viscosity (resistance to flow)

Description

- Dual cure, flexible adhesive

APPLICATIONS

To bond laser diode TO cans where UV light cannot penetrate through the metal or the non-UV transferable plastic TO cans. It is recommended to be used where instant fix for the aligned parts can be accomplished by UV, then thermal post cure of the fixed parts provides complete cure in areas where UV light cannot penetrate.
